

AYUSH KUMAR

ayushchaudhary98012@gmail.com | +91 6205958480 || [LinkedIn](#)

Skills

-
- Java | C | Html | CSS | JavaScript | Python
 - Communication | Multitask | Strategic | Technical | Verbal

Career Objective

-
- "Driven IT Enthusiast with a Solid Foundation in Java. Passionate About Problem-Solving and Delivering Efficient Solutions. Eager To Collaborate Within Dynamic Teams and Contribute to Innovative Projects in a Professional Software Development Environment."

Education

Bachelor of Engineering: Computer Science (AIML) | AMC Engineering College | VTU | 2023-2027 [7.7cgpa]

Projects

Email & SMS Phishing Detection System Using ML | Oct 2025

- Developed **PhishGuard AI**, an Android-based phishing detection system that identifies fraudulent **emails and SMS** using a multi-layered machine learning pipeline. Implemented real-time message capture, sender reputation analysis (reverse DNS, domain age checks), URL scrutiny, and lightweight ML classification using **TensorFlow Lite** and **Naive Bayes**.
- Built using **Java**, Android native frameworks, **Retrofit**, **dnsjava**, and **SQLite**, the system processes messages on-device for privacy and efficiency. Designed a decision engine that categorizes messages (safe, suspicious, phishing, scam) and provides immediate alerts with explanation. Achieved a **lightweight, mobile-optimized architecture** suitable for resource-constrained devices while ensuring dependable phishing and spam detection.

Sentiment Analysis of E-Consultation Comments| Sep 2025

- Built an end-to-end AI-driven analytics system for the *Smart India Hackathon 2025* to analyze public comments received through the MCA21 E-Consultation module. The solution features an **AI-powered sentiment classification and summarization engine** using fine-tuned transformer models (BERT/RoBERTa) to categorize comments (Positive/Neutral/Negative) and generate concise summaries.
- Engineered a scalable architecture using **FastAPI/Flask**, **React.js**, **PostgreSQL**, **Docker**, and **Kubernetes**, with deployment flexibility for **cloud or on-premise** environments to meet privacy requirements.
- The system provides **real-time, actionable insights for policymakers**, enabling faster and more accurate analysis of stakeholder feedback, improving transparency, efficiency, and data-driven governance.

Achievements

-
- Obtained a certificate from college in internal hackathon SIH 2025. | [View certificate](#)
 - Obtained a Certificate IIT kharagpur for completing the course Programming in Java. [View certificate](#)
